

HOLIDAY HARDGOODS
LIMITED EDITION

NOMIS

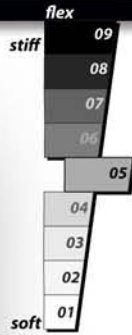

This limited edition hardgoods collection is the first of its kind for NOMIS. For two seasons, we have secretly been testing boards with some of our most demanding team riders. Through this process we have designed two amazing men's boards as well as a super fun women's board for this limited edition offering. With the help from our friends at Technine we have collaborated on three bindings that boast 19 years of design experience. These packages will only be around for a limited time so get them while you can!

159	1200	298	298	252.1	53	53	7	7850	546	466	626	21.50	18.35	24.65	10

Not everyone on the mountain wants to stand out. Some of us like our tricks and skill to define our image. We see you all the time in the park or back country, dressed modestly in black and white. You pass everyone nonchalantly going so ridiculously fast that people mistake you for Zorro. Out of nowhere you destroy whatever your hitting, leaving everyone wondering who you are. The Era board and binding is designed perfectly for you! A clean and simple look with no excess flair, it's built to handle those gnarly high speeds you need to hit to keep yourself unknown.

Men's #1048103

ERA Binding

Features

- Pro Frame Heelcup (6061 T6 Aluminum)
- Comfort King II Dual Density EVA Ankle Straps
- Baltimore Toe Strap
- Tool-free Quick Adjust Ladders

- Fiberglass: Stitched bi-axial laminate
- Base: Extruded IS 1320 with screened art
- Core Features: 3-Layer interior rubber dampening
- Board Features: Custom Jib Edge
- Graphic Features: High gloss topsheet with rough touch effects

The first thing that comes to mind when you see this board is the Teenage Mutant Ninja Turtles. The truth is the turtles were the inspiration for this graphic package and construction. Donatello was the master of stealth, the subtle black CONNECTED top sheet reflects that, but a poppy colored base is a turtle punch to the face when you're hitting park jumps or filming with your homies. Donatello uses a wooden staff right? Well guess what, that same poplar wood is used in the reverse camber core to make it tough and snappy when you're on the shred. Pair this set up with the matching Nomis X Technine colab bindings and you will be well on your way to becoming the master engineer that Donatello was best know for.

"Don't melt our mountains!" What would we all do if global warming took full effect? There would be no snow left. What would we do?! Here's some options: Make as many ice cubes as possible and blend them to a fine powder and spread them all over your nearest mole hill and hope to get a turn in. Or maybe buy as many 7-11 big gulp slurpies as you can and dump them all over your drop in ramp? Neither sounds like very much fun! This board graphic was created to make us think about the snow and how we can't take it for granted. As they say "You don't know what you've got 'til it's gone" so let's take care of our planet and not let that happen. This super fun reverse camber board should serve as a reminder.
