SIEGE Audio. Never Go Quietly

MUSIC

Lifestyle and Music were made for each other. They had the same friends, wore the same clothes, and even went to the same parties. But they never really connected, until one fateful night when Music got ditched by its friends and Lifestyle gave it a ride home. One shotgun wedding and 9 months later, SIEGE came screaming into the world as the Golden Child of audio.

Born fluent in all things steez, SIEGE Audio was brought up keeping it real. Real style. Real Quality. Real precision. Real street. Real aggressive. It's this unfakeable authenticity that gets SIEGE mad props from visionary trend-setters and the hardest audiophiles around the world. In a sea of punk-ass faker wannabes desperately treading water, SIEGE is a nuclear powered battle ship flying full speed ahead at 80 knots on its way to world domination.

Prepare for the invasion.

We are SIEGE Audio. Never Go Quietly.

A large part of our branding strategy revolves around recruiting some of the largest skaters, snowboards, surfers, DJ's, Musicians and Bands in the world to join our ranks. Our current line-up is close to perfect and we are ever expanding our ranks.

SIEGE Assets and Contributions

In addition to maintaining a credible and compelling brand, we bring many assets to the table to help promote the sell through in our retailers.

We are making large strides on our side to push the brand onward and upward to increase mind and market share.

We will be running print ads in boutique publications, building a community around our ever-growing website, sending targeted email campaigns to our 1,000,000 plus database, and pushing our team of professional athletes, musicians, artists and DJ's.

ELEVEN in Black
SA-EVN0901/blk

ELEVEN in White
SA-EVN0901/wht

ELEVEN in Yellow
SA-EVN0901/ylw

Specifications:

Driver: Full Spectrum Sound 57mm
Frequency: 16-20kHz
Sensitivity: 110dB
Impedance: 32 Ohms
Cord length: 1.5 meters + modular design
Plug Type: Slim 3.5mm gold plated
Cable: Flat Woven Sheathing

One-upping the rest of the audio world

Ten is so yesterday. The ELEVEN is one louder and a thousand times better. With modular cord design, 57mm SIEGE precision tuned drivers, and rotating / swivel ear cups, it can throw down with any professional DJ set you toss it in the pit with. Crank these bad boys up and blow your mind as well as your expectations.

Key Selling Points:

- + Professional DJ Ready Design
- + 57mm Tuned Sound Drivers
- + Collapsible for Easy Travel
- + Removable Cable Design
- + Tangle-free Flat / Woven Cable
- + Premium Materials and Finishes

DIVISION in Black
SA-DIV0901/blk

DIVISION in Red
SA-DIV0901/red

DIVISION in White
SA-DIV0901/wht

Specifications:

Driver: Full Spectrum Sound 40mm
Frequency: 18-20kHz
Sensitivity: 110dB
Impedance: 32 Ohms
Cord length: 1.2 meters + volume control
Plug Type: Slim 3.5mm gold plated.
Cable: Flat Woven sheathing

This is the dividing line.

At last, an on-ear headphone that actually stays where it belongs - on your sound holes. The DIVISION is Shangri-La for those who want studio sound without all the bulk. The ear cups have a slim tapered shape with a sleek padded headband to keep the profile down. With the DIVISION you get everything you need in a lightweight headphone that still packs heavyweight sound. Divide yourself from the sub-par headphone equation and add SIEGE Audio.

Key Selling Points:

- + **Sleek and Comfortable Shape**
- + **Premium Materials**
- + **40mm Tuned Drivers**
- + **Tangle-free Woven Cables**
- + **Inline Volume Adjuster**

Shock-and-awe sound you will never see coming.

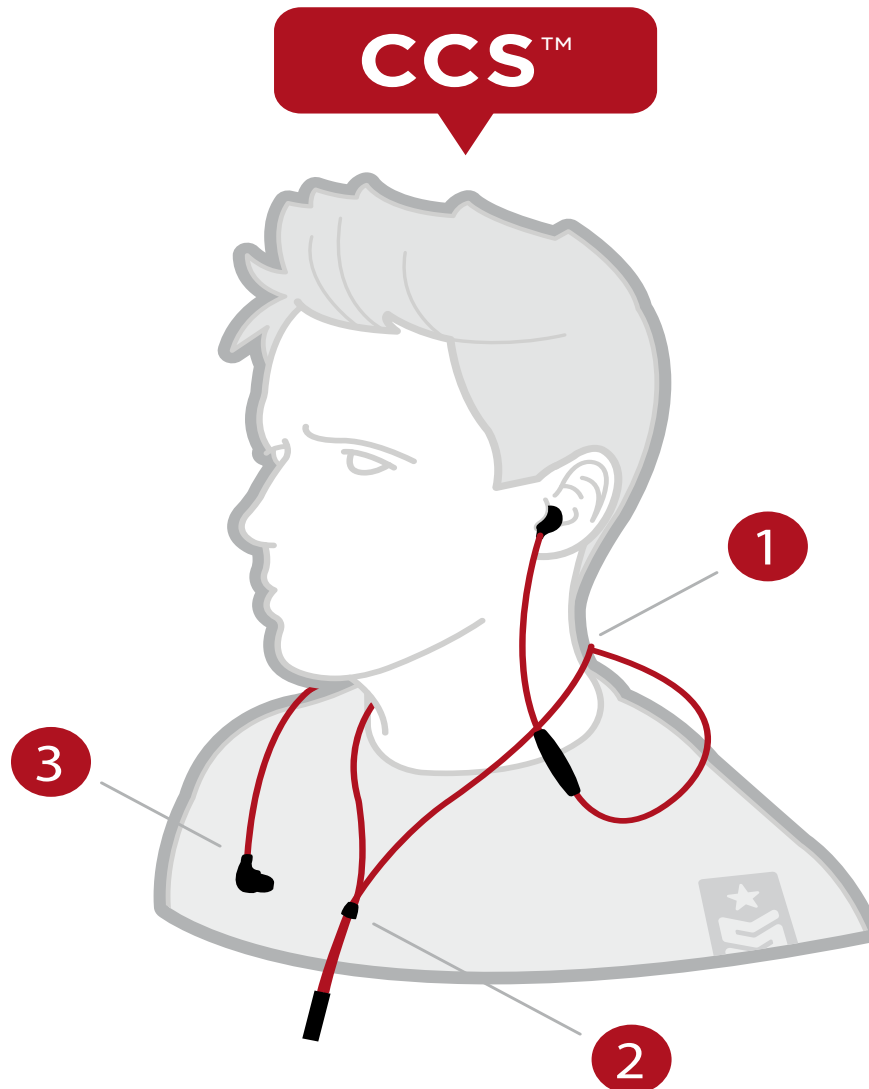

The STEALTH sneaks up on you covert ops style. If you're agro about music, these are the buds for you. Tuned for total listening perfection, both the highs and lows hit with tactical precision. A comfy, low-profile housing and the exclusive SIEGE Audio Cord Control System ensures they lay low and out of sight in your ears, right where you left them.

Specifications:

- Driver:* Full Spectrum Sound 10mm
- Frequency:* 16-20kHz
- Sensitivity:* 104dB
- Impedance:* 16 Ohms
- Cord length:* 1.2 meters + volume control
- Plug Type:* Slim 3.5mm gold plated.
- Cable:* Woven sheathing with CCS

Key Selling Points:

- + **Cord Control System (CCS)**
- + **Precision Tuned 10mm Drivers**
- + **Inline Volume Adjuster**
- + **Low-profile Comfortable Shape**
- + **Extra Foam and Silicone Caps**

CCS Available on the STEALTH

The Stealth Ear Buds feature a unique cord control system which, by design, allows for a variety of placement options and enhanced usability. By having the ear bud cords separate over two feet, and three adjustable sliders in between, the SIEGE Stealth Earbuds can be worn more securely, are more functional, and easier to share.

By placing the first of three sliders about 8" from the earbuds and the second slider another 18" from the first, a loop will form - large enough to slip over the head.

- 1** Slip the loop over the head and place CCS Slider #1 comfortably on the back of the neck.
- 2** Adjust CCS Slider #2 into a comfortable position on the chest or for more security, closer to the neck.
- 3** This behind-the-neck placement keeps any tension off the earbuds, transferring it to the back of the neck. This position also allows the earbuds to hang conveniently close when not in use.

ALPHA MIC in Black
SA-ALPM0901/blk

ALPHA MIC in Green
SA-ALPM0901/grn

ALPHA MIC in Yellow
SA-ALPM0901/pmg

ALPHA MIC in Red
SA-ALPM0901/red

Specifications:

Driver: Full Spectrum Sound 10mm
Frequency: 18-20kHz

MICROPHONE:

Type: Electret Condenser Microphone
Polar Pattern: Omnidirectional
Impedance: Low
Sensitivity: 58dB (+/- 3dB)
Frequency: 30 - 16kHz

Step up to the MIC.

The ALPHA with MIC is a ridiculous upgrade from anything close to the same price. It's everything you know and love about the original ALPHA with a MIC and remote thrown in for good measure. Plug these badass buds into your music machine or your portable telephone and set your hands free. With one touch you can answer and hang up on people or skip to your favorite track when you're gangster walkin' down the street.

Key Selling Points:

- + 10mm Sound Drivers
- + Inline MIC / Remote Combo
- + Tangle-free Woven Cables
- + Inline Volume Adjuster
- + Slim Tapered Shape
- + Extra Silicone Caps

ALPHA in Red
SA-ALP0901/red

Specifications:

Driver: Full Spectrum Sound 10mm
Frequency: 18-20kHz
Sensitivity: 104dB
Impedance: 16 Ohms
Cord length: 1.2 meters + volume control
Plug Type: Slim 3.5mm gold plated.
Cable: Round Woven sheathing

Step up to the MIC.

We go to great lengths to provide a quality listening experience, no matter how much jack you throw down. Exhibit A, the ALPHA buds. Taking entry level to a whole new level, they're a redonkulous upgrade from anything even close to the same price. Ingeniously designed with a tapered shape and interchangeable capes, they're crazy comfortable no matter what size of ear is stuck to the side of your head. The second you hear the clear, sublime sound that pours out of these badass buds, you'll instantly understand why we named them the ALPHA.

Key Selling Points:

- + 10mm Sound Drivers
- + Tangle-free Woven Cables
- + Inline Volume Adjuster
- + Slim Tapered Shape
- + Extra Silicone Caps

Cable: Tangle Resistant PU

Don't Get it Scrambled

We don't believe in limitations. We also don't believe the hardware needed to explore the sounds you want should be out of your pay grade - In comes the CODEC Earbud by SIEGE Audio. There's no reason to settle for the status quo when you can have next level sound, fit and finish that won't rob your pocketbook. Listen in peace and hear the difference with the CODEC.

Key Selling Points:

- + **Wide Spectrum Sound Drivers**
- + **Inline Volume Adjuster**
- + **Tangle Resistant Cords**
- + **Slim shape fits all ear types**

Thank you.
